

## Can I use my Hercules DJ controller with other software?

(Updated: October 2016)

All Hercules DJ products are standard **MIDI** controllers, and as such, can be used with any DJ or music applications that support this type of controllers.

Among the most popular for **Windows** and **OS X** are:

	DJ		Commercial/Free
	Windows	OS X	
<a href="#">VirtualDJ Pro</a>	●	●	Commercial
<a href="#">Native Instruments Traktor Pro 2</a>	●	●	Commercial
<a href="#">Mixvibes Cross DJ</a>	●	●	Commercial
<a href="#">Stanton Deckadance 2</a>	●	●	Commercial
<a href="#">Algoriddim DJay Pro</a>		●	Commercial
<a href="#">Rekordbox DJ</a>	●	●	Commercial
<a href="#">Ultramixer</a>	●	●	Commercial
<a href="#">Future.DJ Pro</a>	●	●	Commercial
<a href="#">PCDJ Dex 3</a>	●	●	Commercial
<a href="#">Zulu DJ</a>	●	●	Commercial/Free
<a href="#">Mixxx</a>	●	●	Free

Your DJ controller should be “natively” supported by most software, meaning that it should work with minimal or no configuration required. In other cases, you will either need to load a custom MIDI mapping (some available from the [Hercules Technical Support](#) site), or create your own, using the software’s “**MIDI Learn**” function.

The software developer’s web site should have all the details regarding the support and configuration of MIDI controller.

Many software geared toward music production, sample remix or finger drumming may also be used with your controller:

Applications under **iOS** also support certain MIDI controllers (requiring the USB camera kit + a powered USB hub):
