**My computer's case features an additional Firewire® port. Can it be used with the Digifire 7.1 internal connector, and how would I go about connecting it?**

The Digifire 7.1 internal connector can be used with any Firewire® port, as it follows a standard configuration.

The pin assignments are as follow:

Internal connector layout

Pin	Signal Name	Pin	Signal Name
1	TPA+	**2**	TPA-
3	Ground	**4**	Ground
5	TPB+	**6**	TPB-
7	+12V (Fused)	**8**	+12V (Fused)
9	Key (no pin)	**10**	Ground

Consult the manual for more details about the wiring scheme used by the case's port.
