

Why is new ATI DVD player of MMC 8.1 not available for 3D Prophet AIW 7500 and 3D Prophet AIW 8500DV?

ATI released a new MultiMedia Center version 8.1 that benefits of a new DVD player. This one is only provided for free to owners of *3D Prophet AIW 9000Pro* (downloadable from <http://www.hercules.com/> and requires the original CD).

Owners of *3D Prophet AIW 7500* or *3D Prophet AIW 8500DV* can still use their previous free DVD player and upgrade the rest of the Catalyst driver suite by following the instructions present on <http://www.hercules.com/>.

US and Canadian customers can purchase the new MMC8.1 CD directly from www.ati.com web site. Hercules may provide similar solution to the other customers very soon.
