

I don't want to uninstall my old modem before installing my Hercules Modem router. How can I proceed so that the connection to websites will be carried out by my Hercules Modem router?

If you do not wish to completely uninstall your old modem, we recommend that you proceed as follows.

Launch Internet Explorer, then select the "Tools" menu and "Internet Options...".

Select the "Connections" tab and make sure that your Internet Service Provider is listed in the list of connections.

If your ISP is listed, highlight it and then select the "Never dial a connection" option in order to properly connect via your Hercules Modem router.

Validate by clicking "OK".
