

## How can I renew my system's IP address?

The addressing of your system's IP address may result in connection problems, such as a "limited connectivity" situation or the lack of a Default gateway in an Infrastructure type network, for example.

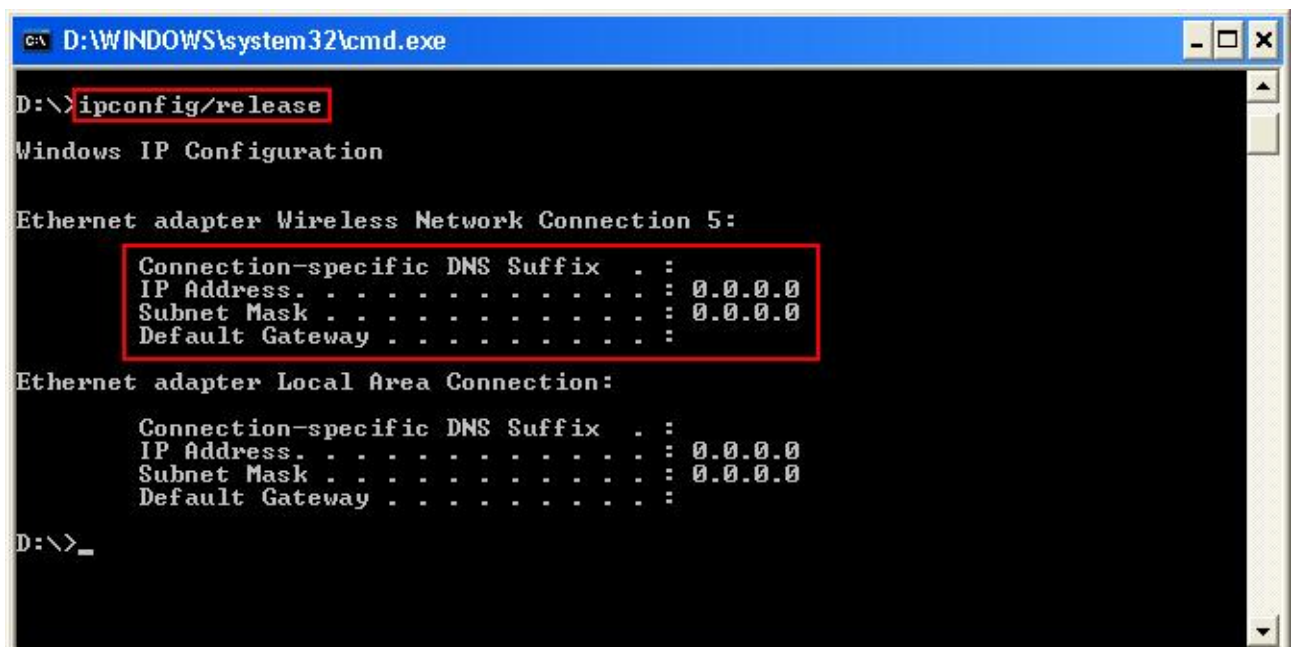

If you encounter this type of problem, we recommend that you renew your system's IP address as follows:

1. Click "Start/Run" and then enter "command" (for systems running Windows 98SE or Windows Millennium) or "cmd" (for systems running Windows XP or Windows 2000) to enter the command window.

2. In the command window, launch the command "*ipconfig/release*" and wait until the IP addresses are reset to 0.

For Windows 98 and Windows Millennium the command is "*ipconfig/release\_all*".

3. Next, launch the command "*ipconfig/renew*" to renew the IP address.

For Windows 98 and Windows Millennium the command is "*ipconfig/renew\_all*".

```
C:\ D:\WINDOWS\system32\cmd.exe
D:\> ipconfig/renew
Windows IP Configuration

Ethernet adapter Wireless Network Connection 5:

    Connection-specific DNS Suffix . . . . . :
    IP Address. . . . . : 192.168.1.15
    Subnet Mask . . . . . : 255.255.255.0
    Default Gateway . . . . . : 192.168.1.1

Ethernet adapter Local Area Connection:

    Connection-specific DNS Suffix . . . . . :
    IP Address. . . . . :
    Subnet Mask . . . . . :
    Default Gateway . . . . . :

D:\>
```

Once you have finished renewing your IP address, make sure that a "Default Gateway" has also been assigned.

This renewal will only be carried out properly if you are using an IP address that is automatically assigned. If you are using a fixed IP address, these commands will not change anything in your configuration.

**Tips:**

To verify your type of IP address (automatic or fixed), please refer to the FAQ "How can I find out my computer's IP address?" corresponding to your operating system.

If you encounter the "limited or no connectivity" error message, please refer to the FAQ "My connection has a 'limited or no connectivity' error message and I can't access the Internet or my Modem router."
