**I always receive a "C:\WINDOWS\SYSTEM32\AUTOEXEC.NT" error message when launching the installation CD-ROM.**

When launching the WiFi Station or WiFi Manager installation CD-ROM, you may encounter the following error message:

"C:\WINDOWS\SYSTEM32\AUTOEXEC.NT. The system file is not suitable for running MS-DOS and Microsoft Windows applications. Choose 'Close' to terminate the application."

This error message is not caused by the Hercules installation CD-ROM, but rather by the *"Autoexec.nt"* system file. Windows is unable to find this file when launching the installation CD-ROM, the file most likely having been deleted by another application.

To resolve this problem, proceed as follows:

1. Go to *"C:\Windows\repair"* and find the file *"Autoexec.nt"*.
2. Copy this file to *"C:\Windows\system32"*.
3. Right-click the file *"Autoexec.nt"* that you have just copied, and select *"Properties"*.
4. Tick the *"Read-only"* box and then click *"OK"*.

After following this procedure, you will now be able to launch the installation CD-ROM for your Hercules WiFi product.
